## Vantage Pro2 Accessories

art.no. 7654EU

### long-range wireless repeater (solar-powered)

The solar-powered long-range wireless repeater extends the range between the receiver and transmitter of the Vantage Pro2 station by up to 10 times of the distance of a standard wireless repeater. For the long-range wireless repeater two long-range antennas are required: one for receiving and one for transmitting the data. The range can vary depending on the selected antenna (**Dipole** – in any DAVIS remote weather station or in standard repeater - **Omni** – receives and transmits in all directions - or **Yagi** – receives or transmits from a single direction but has a longer distance range) and the type of use in the network. As backup during power outages, the repeater contains a battery.

#### scope of delivery:

- solar-powered long-range wireless repeater
- mounting hardware
- CR 123A 3-volt lithium battery

<b>general information</b>	dimensions (L x W x D):	159 mm x 200 mm x 57 mm
	weight:	approx. 0.54 kg
	housing material:	UV-resistant PVC plastic
	permitted operating temperature:	-40°C to +65°C
	current draw:	0.3 mA (with 1 ID)
	power source:	solar power (0.5 Watts)
	batteries :	CR 123A 3-volt lithium battery
	antenna connectors:	TNC female
<b>wireless communications</b>	repeater transmit interval:	2.5625 - 3.0000 seconds per ID.
	transmit/receive frequency:	US models: 902-928 MHz FHSS European models: 868.0-868.6 MHz FHSS.
	ID codes available:	8
	output power:	US models: less than 8 mW, no license required (FCC-certified) European models: less than 8 mW, no license required (CE-certified)
	range:	depending on combination (p.r.t. table below)
