

Flow Meter DF9648

- Measuring range programmable ± 99999 Digit
- Measuring unit programmable
- 2 totalizers programmable
- Pulse output for external evaluation
- Max. 4 alarm outputs, relay or electronic
- Isolated analog output 0/4..20 mA, 0/2..10 V

Characteristics

The Flow-Meter DF9648 is used in food technology, chemical and pharmaceutical industry and water technology. In connection with any type of pulse flow sensor the current flow rate and total flow can be measured, displayed and converted to an analog output signal. The dosage of quantity may be realized by using the alarm outputs. The optional pulse output allows an external summation of the flow quantity.
