

fixly mounted battery module – ATV 11	
description::	module for power supply of modular probes
batteries:	3 baby cells (type C) alcali-mangan
battery service life:	dependent on formation of probe
interfaces:	AquiTronic RS 485 data bus above and below
cable connection:	connection for probe cable via pressure-tight plug, prolongable
general data:	
housing material:	V4A stainless steel, POM®
sealing:	Viton®
dimensions:	length of probe body: 225 mm diameter: 32 mm
weight:	720 g batteries incl.
operating temperature:	-20°C to +70 °C
also as option „pluggable mounted cable“ available (ATV 10)
