

# Vantage Pro2 WeatherLink

software & data logger

**ACCESSORIES**

## WeatherLink (data logger serial / USB incl.)

art.no. **6510SER** (serial)  
/ **6510USB** (USB)

WeatherLink consists of the WeatherLink software and a special data logger (for serial or USB port) that can be connected to the Vantage Pro2 or Vantage Vue console. Together, they transmit the data from the weather station to the computer, creating a permanent database. Once stored in the database, your weather information can be used to generate a wide variety of reports and graphical displays, and can also be shared via the internet.

When ordering, please let us know your operating system for compatibility check.

### scope of delivery:

- WeatherLink software
- WeatherLink data logger with serial or USB port (depends on version)
- 2.4 m cable to connect data logger to computer

### WeatherLink software

#### functions:

- displays the current weather station data in a real-time "bulletin" on the computer
- allows you to set and clear data in the weather station console (time and date, highs and lows, alarm thresholds, calibration numbers, etc.) from the computer
- graphs archived weather data on an hourly, daily, weekly, monthly, or yearly basis
- generates Weather Watcher reports in the National Climatic Data Center (NOAA) format
- collects data from multiple weather stations on the same computer
- compatible with Weather Monitor II, Weather Wizard III, and Perception II weather stations
- internet support for creating your own weather website and for uploading other files such as web cam images

#### requirements:

- computer running Windows™ 95, 98, ME, NT 4.0, Windows 2000, XP or Vista (for 6510SER); Windows™ 98 SE, ME, Windows 2000, XP or Vista (for 6510USB); Mac-user need a special software (Art.No. 6520)
- at least one free serial port (for serial connection: 6510SER) or USB port (for USB connection: 6510USB)
- 5 MB of free disk space (the actual storage required depends on the amount of data and the archive interval)

### WeatherLink data logger

#### functions:

- archives weather data for subsequent transfer to the computer
- allows automatic and manual download of weather data
- manages data communication between the weather station and the WeatherLink software
