

power[cube] POWER SUPPLY

Power pack for all weathers

The compact cube is an all-weather-resistant power pack and rounds off for example the rain[e] station regarding power supply and communication. Beside the data logger met[LOG] it protects the net adapter (24 V/ 150 W) and the WiFi router against all weather influences.

- easy installation
- very robust
- to be used individually for different types of sensors
- 24 VDC, 150 W, 90...264 VAC
- housing made from UV and weather-proof material

APPLICATIONS

- building services
- agricultural meteorology
- industry and hydrology
- artificial snow
- plants
- traffic meteorology

Professional Line	power[cube] POWER SUPPLY
Id-No.	00.14966.715000: power[cube] Power supply 24 V/ 150 W incl. terminal block 30.95800.015000: power[cube] incl. data logger met[LOG] 30.95800.115000: power[cube] incl. data logger met[LOG] and WiFi router
Output	24 VDC • 24...28 V
Output current	max. 6,5 A
Input voltage	90...264 VAC
Input frequency range	47...63 Hz
Rated power	156 W
Operating conditions	-20...+60 °C • Storage temperature: -40...+85 °C
Dimensions	approx. 190 x 190 x 190 mm
Housing	made from UV and weather-proof material
Options (order separately)	32.14966.030000: Mast attachment for power[cube]

As of: 12.06.2019
